PRIDE OF WANAKAH

THIS Beautiful Glad was originated by us and introduced last year. As stock was scarce we put on a limit of 6 to a person, so as to give wide distribution. People who saw this variety in bloom ordered as high as 25, which orders were filled only in part. So we have the main stock and as it is a heavy propagator, have a very good amount of splendid stock this Season. Do not fail to order some of this **SUPREMELY BEAUTIFUL GLAD!**

See Description on Back Cover.

Price, Only \$2.00 Each, and Worth \$10.00

CHRISWELL ORIGINATIONS

Among the thousands of new varieties we have produced are several that are magnificent beyond description. At the American Gladiolus Society Annual Show, held in New York City, 1924, against International competition, we won FIRST PRIZE for BEST COLLECTION NEW SEEDLINGS, showing Ten Superb Varieties. Many others just as fine were not then in bloom. No varieties ever brought out, regardless of Fancy Prices that may be asked for them, are superior to some we have originated and are developing

Admirers of this Grandest of All Flowers indeed have a rare treat in store as these Wonderful Creations are released one by one.

FIVE GLORIOUS GLADS!!
Introduced 1925 and sale limited for that year to one bulb to a person

DOZ. AT PRICE OF 10; SIX AT DOZ. RATE

No. 26. JUDGE RAINES. Richest dark red, just the color of raspberry jam, a mighty attractive color as any small boy (and some bigger ones) will say. Flaked with a still darker shade of black-red. Never another quite so richly colored. Extremely late, taking about 125 to 150 days to bloom. (Named for an Uncle, a Prince among men, who loved the Glads.) each 1.00

No. 52. WANAKAH CLUB. Another massive and strikingly beautiful Glad. Brilliant rose red with most wonderful shadings of deeper reds, running to very rich dark velvety red in centre. Very ruffled. Made such a tremendous hit at the Country Club that we just had to name it for the Club.

.....each 1.00

No. 82. MT. RAINIER. This is an Extra Grand White. A strong grower with unusually broad leaves. Glistening Ivory white with a gleam of gold in center and a faint dash of purplish red, like the rays of the setting sun on the ice-clad peak. Large, over 4" with a slightly hooded effect, showing Prim blood. This is one of the Prize Winners at the New York Show and many an Exclamation from admiring visitors, was heard, both at N. Y. and at Rochester last Aug. A flower of most striking Grandeur. Each 1.00

No. 88. MRS. FLOYD WILLS. Tall, strong grower of a color difficult to describe. An unusual shade of mauve lavender heavily striped with another unusual shade of darker mauve. The general effect is a very striking lavender. Very late, requiring 125 days. This variety has emphatically taken "The 400" by storm, some of whom declare it to be our finest Glad, and always use it for special decorations. We admit it is "Some Glad" Each 1.50

No. 99. ARTHUR A. BLIGHT. Beautiful dark red with more than half of the two lower petals like coal-black velvet. No other colors. Richest combination imaginable. Dainty slender stem, not very tall, but good size flowers, of Primulinus type. A most entrancing Glad.....each .50 (A truer friend we never had.)

TWO BEAUTIES!! New This Year.
Never before offered.

BIG FIRE CHIEF. Enormous Chap, dressed in Firey Orange Scarlet, decorated with two large Gilt Badges. This is our very Largest Glad, often measuring 6¼" across.

Should be cut when first flower opens and bloomed in the house, as it does not stand storms or high winds, on account of its large size. Does fine inside and surely looks like "going to the Fire" at a Hot Pace! Each .50; 6 for 2.50

FUCHSIA. Large flower of richest shade of Fuchsia, very dark in Throat. Unusual Color and Very Beautiful. Scarce. Each 1.00

- 1 Plant in as Direct Sunlight as possible.
- 2 Plant Deep - Four to Six inches.
- 3 Water thoroughly in Dry Times.

- 7 Plant in Succession - April? to July first.
- 9 Last but not Least! Plant Gladacres Bulbs.

4 GLADACRES SPECIALS

A few of our own production first put out in 1923. These have proved to be exceptionally desirable. Mr. Gersdorff, the expert tester, who tried out these varieties, says: Yours rated uniformly high, indicating discrimination in your selection of seedlings to be named."

No. 21. MARJORIE SMITH. Described as follows by Mr. Gersdorff under heading, "Super-Glads" in American Gladiolus Society Bulletin, July, 1924: "A distinctive deep rose colored variety. Rose red blended tyrian rose and blotched ox-blood red, finely ruffled, rated Exhibition 94, Commercial 95." Very tall and strong and massive grower and has made a tremendous hit in our field and showroom.

each .50; doz. 5.00

No. 24. HER MAJESTY. Light lavender pink, striped and tipped deeper. Solferino Iris veined throat. Tall and fine.

each .20; doz. 2.00

No. 121. BETTY MURRAY. Rose pink of the most beautiful shade, deepening a little in the throat. Large and very showy. This is sure a peach. A basket of this variety makes a most beautiful decoration.

each .25; doz. 2.50

No. 28. KILLDEER. Reminds one of that beautiful bird in flight. Silvery white, creamy throat with small violet stripe. Lemon buds. A wonderful White, somewhat on the Prim. type. Grows over five feet 8 inches tall in our field, with flowers over 5" across. Very late and stands the frost well. Blooms for a long time after cutting thus prolonging the "Glad" season very materially.

Coming on, as it does so very LATE, when most of the other Glads are done, and flowers of all kinds are scarce, it brings the Very Best Price, especially as the spikes are so Tall and Massive. We depend on KILLDEER for our supply of very Late Whites, and a year ago cut them in the field as late as Nov. 8. These lasted well for Thanksgiving Day. Again this past Fall, the Thanksgiving Turkey was supplemented by a few "KILLDEERS". Late Migratory Birds, so to speak. I'll say they were!

each .40; doz. 4.00

ORNAMENTAL SHRUBS

We call Special Attention of People of this locality - Lake Shore, Buffalo and vicinity - to our Fine Line of SHRUBS. Nothing so Transforms, so Beautifies the Home Grounds as a Planting of Ornamental Shrubs. And nothing is more Important in the Successful Planting of Shrubs than the quick re-planting and thorough watering, after dug at Nursery. Our Transplanted Shrubs, if immediately replanted after digging are sure to go on almost as if undisturbed.

Furthermore, there is no shock from change of climate. Our stock, growing here on the Lake Shore, is accustomed to Severe Conditions and will do better than those grown in more mild locations. Plant Shrubs. Plant Many Shrubs. They Double their Value for you Every Year!
